## **Introduction**

The fifty-second edition of the *Statistics of Road Traffic Accidents in Europe and North America* contains the basic statistics provided by the Governments of States members of the United Nations Economic Commission for Europe (UNECE).

Issued simultaneously in English, French and Russian, this publication is used by government services and officials for the analysis of accidents, patterns of accidents and for planning improvements in road traffic safety. This is of particular relevance for the ECE region as in the decade 1999-2008, there were on average 150 000 persons killed and about 5.5 million persons injured annually in more than 3.8 million road accidents. For this reason, a wider international audience, including the private sector, journalists, researchers, students and the general public, also use this publication.

*Statistics of Road Traffic Accidents in Europe and North America* is divided into three basic parts with an annex. The first part presents charts and summary tables on the overall situation and developments in road traffic accidents and casualties in the UNECE countries. The second part provides detailed statistics on road traffic accidents and includes specifics of accidents such as location, time of occurrence, road condition, personal injuries and deaths, as well as accidents influenced by alcohol. The third part shows background statistics on countries' vehicle fleets, estimates of vehicle-kilometres run and estimates of population by age group. The annex contains definitions.

As readers may know, cross-country comparability of data is not always perfect. However, every effort has been made to harmonize the definitions and ensure international comparability. Also, an Intersecretariat Working Group, composed of representatives of the UNECE, the International Transport Forum (ITF) and the Statistical Office of the European Union (EUROSTAT), prepared a common questionnaire, also containing common definitions, which further harmonizes collection of this data and avoid duplication of efforts in the various organizations. This work is supervised by the UNECE Inland Transport Committee and, more particularly, by its Working Party on Transport Statistics (WP.6). Details of this work can be found at [www.unece.org/trans/main/wp6/wp6.html](http://www.unece.org/trans/main/wp6/wp6.html).

## **Introduction**

La cinquante-deuxième édition des *Statistiques des accidents de la circulation routière en Europe et en Amérique du Nord* contient les données de base fournies par les gouvernements des États membres de la Commission économique des Nations Unies pour l'Europe (CEE-ONU).

Cette publication, éditée simultanément en anglais, français et russe, est utilisée par les services gouvernementaux et les fonctionnaires pour l'analyse des accidents et de leur répartition ainsi que pour la planification des améliorations qu'il convient d'apporter à la sécurité routière. Ceci revêt une importance particulière pour la région de la CEE, étant donné qu'au cours de la décennie 1999-2008, on a pu compter en moyenne 150 000 tués et environ 5,5 millions de blessés par an dans plus de 3,8 millions d'accidents de la route. C'est pourquoi l'audience internationale de cette publication s'étend au secteur privé, aux journalistes, aux chercheurs, aux étudiants et au grand public, qui l'utilisent également.

La publication *Statistiques des accidents de la circulation routière en Europe et en Amérique du Nord* est composée de trois parties essentielles et d'une annexe. La première partie contient des graphiques et des tableaux synthétiques sur la situation globale et l'évolution des accidents de la circulation routière et des victimes dans la région de la CEE-ONU. La deuxième partie fournit des statistiques détaillées sur les accidents de la circulation routière et comprend les particularités des accidents comme le lieu et l'époque à laquelle l'accident est survenu, les conditions de circulation, les accidents ayant entraîné des lésions corporelles et des décès, ainsi que les accidents survenus sous l'effet de l'alcool. La troisième partie présente des données statistiques sur le nombre de véhicules en circulation dans les pays, des estimations des véhicules-kilomètres parcourus et des estimations de la population par tranche d'âge. L'annexe contient des définitions.

Comme le lecteur le sait, la comparabilité des données entre les pays n'est pas toujours parfaite. Toutefois, tout a été fait pour harmoniser les définitions et permettre la comparaison internationale. En outre, un Groupe de travail intersecrétariat, composé de représentants de la CEE-ONU, du Forum International des Transports (ITF) et de l'Office statistique de l'Union européenne (EUROSTAT), a préparé un questionnaire commun, contenant notamment des définitions communes, qui permet d'harmoniser davantage la collecte de données et d'éviter les activités redondantes dans les différentes organisations. Ces travaux sont supervisés par le Comité des transports intérieurs (CTI) et, plus particulièrement par son Groupe de travail sur les Statistiques en matière de transport (WP.6). Les détails de ces travaux se trouvent sur: [www.unece.org/trans/main/wp6/wp6.html](http://www.unece.org/trans/main/wp6/wp6.html).

## **Предисловие**

52-ое издание *Статистики дорожно-транспортных происшествий в Европе и Северной Америке* содержит основные статистические данные, предоставленные правительствами государств-членов Европейской экономической комиссии Организации Объединенных Наций (ЕЭК ООН).

Изданная на трех языках (английском, французском и русском), публикация используется государственными службами и служащими для анализа происшествий, их видов и для планирования повышения безопасности дорожного движения. Данное издание особенно актуально для региона ЕЭК, где за период с 1999 по 2008 год среднегодовое количество пострадавших составило 150 000 погибшими и около 5.5 миллионов ранеными в результате более 3.8 миллионов дорожных происшествий. По этой же причине публикация используется широкой публикой, которая включает в себя представителей частного сектора, журналистов, исследователей, студентов и общественность.

*Статистика дорожно-транспортных происшествий в Европе и Северной Америке* состоит из трех основных разделов и приложения. Первая часть состоит из графиков и сводных таблиц, включающих обобщенную информацию о развитии ситуации в области дорожно-транспортных происшествий и пострадавших в их результате в странах-членах ЕЭК ООН. Вторая часть включает в себя подробные статистические данные о дорожно-транспортных происшествиях, а также данные об обстоятельствах происшествий, таких как место, время, дорожные условия, травмы или смертельный исход, в том числе в отношении аварий вследствие употребления алкоголя. Третья часть посвящена статистическим данным о парке транспортных средств по странам, оценке пробега (единица измерения - транспортное средство-километр), а также оценке населения по возрастным группам. Определения приводятся в приложении.

Возможно, читатели знают о том, что сопоставимость данных по странам не всегда точна. Тем не менее, мы попытались максимально согласовать определения и обеспечить сравнимость данных на международном уровне. Кроме этого, Межсекретариатская рабочая группа, состоящая из представителей ЕЭК ООН, Международного транспортного форума (МТФ) и Евростата, подготовила к выпуску общий вопросник, который будет содержать определения, способствующие дальнейшему согласованию статистических данных и направленные на избежание дублирования усилий по их сбору различными организациями. Эта работа контролируется Комитетом по внутреннему транспорту ЕЭК ООН, в частности, его Рабочей группой по статистике транспорта (WP.6). Более подробная информация о ее работе помещена на сайте [www.unece.org/trans/main/wp6/wp6.html](http://www.unece.org/trans/main/wp6/wp6.html) в Интернете.

## EXPLANATORY NOTES

The 2011 edition of **Statistics of Road Traffic Accidents in Europe and North America** provides basic data on road traffic accidents and casualties in European countries, Canada, Israel and the United States of America. The publication is purely statistical in character. **The scope of the statistics comprises road traffic accidents involving personal injury only, excluding accidents with material damage.** Data relate to accidents by nature of accidents and surroundings, accidents while under the influence of alcohol, and the number of persons killed or injured by category of road user and age group. As background data, figures on the number of road vehicles in use, registration of new vehicles and vehicle-kilometres run by road vehicles are provided in Tables 7 and 8. Table 9 gives estimates of population and distribution by age groups.

### Sources

The statistics appearing in this bulletin are compiled by the secretariat of the United Nations Economic Commission for Europe on the basis of replies to questionnaires submitted by member countries and from official national and international sources.

### Comparability of data

Data are given according to the commonly agreed upon definitions of the Inland Transport Committee of the United Nations Economic Commission for Europe (see annex). Significant departures from the agreed definitions of persons killed are given in the annex, Section C, while departures from other agreed upon definitions are indicated in footnotes.

### Time period

Most of the statistics are presented in the form of time series. In general, the data for the latest year should be considered provisional while those of previous years are final.

### Rounding

Where necessary, each figure has been rounded off to the nearest final digit. For this reason, there may occur in some series an apparent discrepancy between the sum of the constituent items and the totals shown.

### UNECE member countries and nomenclature

As of January 2011, the Economic Commission for Europe is composed of the following 56 member countries: Albania, Andorra, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, Canada, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Georgia, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Kazakhstan, Kyrgyzstan, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Monaco, Montenegro, Netherlands, Norway, Poland, Portugal, Republic of Moldova, Romania, Russian Federation, San Marino, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Tajikistan, The former Yugoslav Republic of Macedonia, Turkey, Turkmenistan, Ukraine, United Kingdom of Great Britain and Northern Ireland, United States of America and Uzbekistan.

## NOTES EXPLICATIVES

L'édition 2011 des **Statistiques des accidents de la circulation routière en Europe et en Amérique du Nord** a pour objet de fournir des données de base relatives aux accidents de la circulation routière et aux victimes dans les pays européens, au Canada, en Israël et aux États-Unis d'Amérique. Cette publication a un caractère purement statistique. **Le champ des statistiques s'étend uniquement aux accidents de la circulation routière ayant entraîné des lésions corporelles, à l'exclusion des accidents ne provoquant que des dégâts matériels.** Les données se réfèrent aux accidents selon leur nature et la situation des abords, aux accidents dus à l'effet de l'alcool, et au nombre de personnes tuées ou blessées par catégorie d'usager de la route et par groupe d'âge. Une statistique auxiliaire dans les tableaux 7 et 8 donne le parc de véhicules routiers, les immatriculations de véhicules neufs ainsi que le nombre de véhicules-kilomètres parcourus. Le tableau 9 donne des estimations de la population et de sa répartition par groupe d'âge.

### Sources

Les statistiques publiées dans ce bulletin sont réunies par le secrétariat de la Commission économique des Nations Unies pour l'Europe à partir des réponses aux questionnaires adressés aux différents pays ou extraits de publications officielles nationales et internationales.

### Comparabilité des données

Les données sont établies conformément aux définitions élaborées par le Comité des transports intérieurs de la Commission économique des Nations Unies pour l'Europe (voir annexe). Les écarts importants par rapport aux définitions convenues des personnes tuées sont indiqués dans l'annexe, Section C, mais les écarts par rapport aux autres définitions sont donnés dans les notes en bas de page.

### Période couverte

La plupart des statistiques sont présentées sous forme de séries chronologiques. En général, les données relatives à la dernière année doivent être considérées comme provisoires tandis que celles des années précédentes peuvent être considérées comme définitives.

### Arrondissement des chiffres

Chaque fois qu'on l'a jugé nécessaire, les nombres ont été arrondis à l'unité du dernier chiffre significatif. Il peut donc y avoir, pour certaines séries, une différence entre la somme des éléments constituants et le total indiqué.

### Pays membres de la CEE-ONU et nomenclature

En janvier 2011, la Commission économique pour l'Europe était composée des 56 pays membres suivants: Albanie, Allemagne, Andorre, Arménie, Autriche, Azerbaïdjan, Bélarus, Belgique, Bosnie-Herzégovine, Bulgarie, Canada, Chypre, Croatie, Danemark, Espagne, Estonie, États-Unis d'Amérique, Fédération de Russie, Finlande, France, Géorgie, Grèce, Hongrie, Irlande, Islande, Israël, Italie, Kazakhstan, Kirghizistan, Lettonie, L'Ex-République yougoslave de Macédoine, Liechtenstein, Lituanie, Luxembourg, Malte, Monaco, Monténégro, Norvège, Ouzbékistan, Pays-Bas, Pologne, Portugal, République de Moldova, République tchèque, Roumanie, Royaume-Uni de Grande-Bretagne et d'Irlande du Nord, Saint-Marin, Serbie, Slovaquie, Slovénie, Suède, Suisse, Tadjikistan, Turquie, Turkménistan et Ukraine.

## ПОЯСНИТЕЛЬНЫЕ ПРИМЕЧАНИЯ

Издание 2011 года **Статистики дорожно-транспортных происшествий в Европе и Северной Америке** содержит основные данные о дорожно-транспортных происшествиях в европейских странах, Канаде, Израиле и Соединенных Штатах Америки. Эта публикация носит чисто статистический характер. **Статистические данные охватывают только дорожно-транспортные происшествия, повлекшие за собой телесные увечья, исключая происшествия, вызвавшие материальный ущерб.** Данные относятся к происшествиям по характеру происшествия и местности, к происшествиям, произошедшим из-за алкоголя, к числу погибших или раненых по категориям пользователей дорог и возрастным группам. Вспомогательная статистика дается в таблицах 7 и 8: число транспортных средств к концу года, новые транспортные средства, зарегистрированные в течение года, пробег транспортных средств. Таблица 9 отражает оценки населения и распределение по возрастным группам.

### **Источники**

Статистические данные взяты секретариатом Европейской экономической комиссии Организации Объединенных Наций из ответов на ежегодные вопросы или из официальных национальных источников.

### **Сопоставимость данных**

Данные приводятся в соответствии с согласованными определениями, которые были выработаны Комитетом по внутреннему транспорту Европейской экономической комиссии Организации Объединенных Наций (см. приложение). Значительные отклонения от принятых определений погибших приводятся в приложении, секция С, поскольку отклонения от других принятых определений указываются в примечаниях.

### **Отчетный период**

Большинство статистических данных представлены в форме динамических рядов. Как правило, данные за последний год следует считать предварительными, а данные за предыдущие годы - окончательными.

### **Округление**

В тех случаях, когда это необходимо, каждая цифра была округлена до ближайшего окончательного разряда. Поэтому в некоторых рядах данных могут иметь место небольшие расхождения между суммой данных по отдельным статьям и приведенными итогами.

### **Страны-члены и номенклатура ЕЭК-ООН**

По состоянию на январь 2011 в состав Европейской экономической комиссии входили следующие 56 стран-членов: Австрия, Азербайджан, Албания, Андорра, Армения, Беларусь, Бельгия, Болгария, Босния и Герцеговина, Бывшая Югославская Республика Македония, Венгрия, Германия, Греция, Грузия, Дания, Израиль, Ирландия, Исландия, Испания, Италия, Казахстан, Канада, Кипр, Кыргызстан, Латвия, Литва, Лихтенштейн, Люксембург, Мальта, Монако, Нидерланды, Норвегия, Польша, Португалия, Республика Молдова, Российская Федерация, Румыния, Сан-Марино, Сербия, Словакия, Словения, Соединенное Королевство Великобритании и Северной Ирландии, Соединенные Штаты Америки, Таджикистан, Туркменистан, Турция, Узбекистан, Украина, Финляндия, Франция, Хорватия, Черногория, Чешская Республика, Швейцария, Швеция и Эстония.

### **DEFINITIONS<sup>1</sup> AND GENERAL NOTES**

#### **A. Definitions relevant to the tables of this Bulletin**

##### **Injury accident**

Any accident involving at least one road vehicle in motion on a public road or private road to which the public has right of access, resulting in at least one injured or killed person.  
Included are: collisions between road vehicles; between road vehicles and pedestrians; between road vehicles and animals or fixed obstacles and with one road vehicle alone. Included are collisions between road and rail vehicles. Multi-vehicle collisions are counted as only one accident provided that any successive collisions happen at very short intervals. Injury accident excludes accidents incurring only material damage.

##### **Fatal accident**

Any injury accident resulting in a person killed.

##### **Non-fatal accident**

Any injury accident other than a fatal accident.

##### **Casualty** Any person killed or injured as a result of an injury accident.

##### **Person killed**

Any person killed immediately or dying within 30 days as a result of an injury accident.

##### **Person injured**

Any person not killed, but who sustained an injury as result of an injury accident, normally needing medical treatment.

##### **Person seriously injured**

Any person injured who was hospitalized for a period of more than 24 hours.

##### **Person slightly injured**

Any person injured excluding persons seriously injured.

##### **Driver (involved in an injury accident)**

Any person involved in an injury accident who was driving a road vehicle at the time of the accident.

##### **Passenger (involved in an injury accident)**

Any person involved in an injury accident, other than a driver, who was in or on a road vehicle, or in the process of getting in or out of a road vehicle.

##### **Pedestrian (involved in an injury accident)**

Any person involved in an injury accident other than a passenger or driver as defined above.

Included are occupants or persons pushing or pulling a child's carriage, an invalid chair, or any other small vehicle without an engine. Also included are persons pushing a cycle, moped, roller-skating, skateboarding, skiing or using similar devices.

##### **Accident between road vehicle and pedestrian**

Any injury accident involving one or more road vehicle and one or more pedestrian.

Included are accidents irrespective of whether a pedestrian was involved in the first or a later phase of the accident and whether a pedestrian was injured or killed on or off the road.

##### **Single road vehicle accident**

Any injury accident in which only one road vehicle is involved. Included are accidents of vehicles trying to avoid collision and veering off the road, or accidents caused by collision with obstruction or animals on the road. Excluded are collisions with pedestrians and parked vehicles.

---

<sup>1</sup> UNECE, Intersecretariat Working Group on Transport Statistics (IWG), *Glossary for Transport Statistics*, Third Edition (2003), (<http://www.unece.org/trans/main/wp6/transstatglossmain.html>).

### **Multi-vehicle road accident**

Any injury accident involving two or more road vehicles only. The following types of injury accidents involving two or more road vehicles are:

- a) **Rear-end collision:** collision with another vehicle using the same lane of a carriageway and moving in the same direction, slowing or temporarily halted.  
Included are collisions with moving vehicles; excluded are collisions with parked vehicles.
- b) **Head-on collision:** collision with another vehicle using the same lane of a carriageway and moving in the opposite direction, slowing or temporarily halted.  
Included are collisions with vehicles slowing or temporarily halted; excluded are collisions with parked vehicles.
- c) **Collision due to crossing or turning:** collision with another vehicle moving in a lateral direction due to crossing, leaving or entering a road.  
Excluded are collisions with vehicles halted and waiting to turn which should be classified under (a) or (b).
- d) **Other collisions, including collisions with parked vehicles:** collision occurring when driving side by side, overtaking or when changing lanes; or collision with a vehicle which has parked or stopped at the edge of a carriageway, on shoulders, marked parking spaces, footpaths or parking sites, etc.

Included are all collisions not covered by (a), (b) and (c). The constituent element for classification of accidents between vehicles is the first collision on the carriageway, or the first mechanical impact on the vehicle.

## **B. Other definitions**

### **Within built-up areas**

Area with entries and exits designated by appropriate traffic signs.

### **Outside built-up areas**

Any areas excluding areas with entries and exits designated by appropriate traffic signs. Includes motorways, unless elsewhere specified.

**Daylight** As reported by the police or other authorities.

**Darkness** As reported by the police or other authorities.

### **Twilight (or unknown)**

A residual category covering cases where daylight conditions were very poor or where no information on light conditions was available.

**Dry road surface** A road surface not covered by water, snow, ice or other substances.

**Other road surface** Any other road surface other than a dry road surface.

### **Motorway**

Road, specially designed and built for motor traffic, which does not serve properties bordering on it, and which:

- a) is provided, except at special points or temporarily, with separate carriageways for the two directions of traffic, separated from each other, either by a dividing strip not intended for traffic, or exceptionally by other means;
- b) does not cross at level with any road, railway or tramway track, or footpath;
- c) is specially sign-posted as a motorway and is reserved for specific categories of road motor vehicles.

Entry and exit lanes of motorways are included irrespectively of the location of the sign-posts. Urban motorways are also included.

### **Urban road**

A road within the boundaries of a built-up area, which is an area with entries and exits specially sign-posted as such.

**E road**

The international "E" network consists of a system of reference roads as laid down in the European Agreement on Main International Arteries, Geneva, 15 November 1975 and its amendments.

**Vehicles involved**

Vehicles directly involved in accidents, and, so far as possible, those indirectly involved, should be recorded on the statistics report form.

a) Are regarded as being directly involved:

- i) Vehicles of which any occupants were killed or injured as a result of the accident.
- ii) Vehicles colliding with one or more vehicles (in motion, stationary, or parked), with pedestrians, with animals or other obstacles;
- iii) Vehicles whose driver or passengers were injured while alighting from or boarding the vehicle.

b) Are regarded as being directly involved:

- i) Vehicles whose movements were considered to have contributed to an accident, but which were not themselves involved.
- ii) Stationary or parked vehicles whose position was considered to have contributed to an accident, but which were not themselves directly involved.

**Road vehicle** A vehicle running on wheels and intended for use on roads.

**Road motor vehicle**

A road vehicle fitted with an engine whence it derives its sole means of propulsion, which is normally used for carrying persons or goods or for drawing, on the road, vehicles used for the carriage of persons or goods. The statistics exclude motor vehicles running on rails.

**Cycle**

Any road vehicle which has at least two wheels and is propelled solely by the muscular energy of the person(s) on that vehicle, in particular by means of a pedal system, lever or handle (e.g. bicycles, tricycles, quadricycles and invalid carriages).

**Moped**

Any two-wheeled or three-wheeled road vehicle which is fitted with an internal combustion engine having a cylinder capacity not exceeding 50 cc. (3.05 cu. in.) and a maximum design speed not exceeding 50 km (30 miles) per hour.

**Motor cycle**

Two-wheeled road motor vehicle with or without side-car, including motor scooter, or three-wheeled road motor vehicle not exceeding 400 kg (900 lb.) unladen weight. This term does not include mopeds.

**Passenger car**

Road motor vehicle, other than a motor cycle, intended for the transport of passengers and seating not more than nine persons (including the driver). The term "passenger car" therefore covers taxis and hired vehicles, provided that they have fewer than ten seats. This category may also include pick-ups.

**Motor coach or bus** Passenger road motor vehicle, seating more than nine persons (including the driver).

**Trolleybus**

A passenger road vehicle, seating more than nine persons (including the driver), which is connected to electric conductors and which is not rail-borne.

**Tram (street-car)**

A passenger road vehicle, seating more than nine persons (including the driver), which is connected to electric conductors and which is rail-borne.

**Goods road vehicle** Road vehicle designed, exclusively or primarily, to carry goods.

**Tractor** Road vehicle designed, exclusively or primarily, to haul other road vehicles.

**Combination of vehicles** Coupled vehicles which travel on the road as a unit.

**Articulated vehicle** Combination of vehicles comprising a motor vehicle and semi-trailer coupled to the motor vehicle.

**Permissible maximum weight**

Total of the weight of the vehicle when stationary and ready for the road (including the weight of the driver and of all other persons carried at the same time) and of the weight of the load declared permissible by the competent authority of the country of registration of the vehicle.

**Accident with drivers reported under the influence of alcohol, drugs or medication**

Any injury accident where at least one driver is reported to be under the influence of alcohol, drugs or medication impairing driving ability, according to national regulations.

**C. Departure from the definition of persons killed, and of serious and slight injuries**

Significant departures from the commonly agreed definition are as follows:

**Austria:** As from 1966 till 1991, persons are recorded as killed who die within 3 days as a result of the accident; persons who die later are recorded as injured. Before 1966 and as from 1992, the standard definition was applied whenever possible.

**Greece:** Persons are recorded as killed who die within 3 days as a result of the accident; persons who die later are recorded as injured.

**Latvia:** Persons are recorded as killed who die at the scene of the accident or within 7 days; persons who die later are recorded as injured.

**Portugal:** Persons are recorded as killed who die at the scene of the accident or during or immediately after transport from the scene of the accident; persons who die later are recorded as injured.

**Spain:** Persons are recorded as killed who die within 24 hours as a result of the accident; persons who die later are recorded as injured.
